Ticket ID	INC-2024-08471	Status	Resolved
Date Submitted	2024-07-15 09:42 AM IST	Priority	● CRITICAL
Submitted By	Priya Mehta priya.mehta@acmecorp.com	Category	Access / Data Loss
Department	Finance – Accounts Payable	Assigned To	Platform Engineering Team
Affected System	Oracle Financials ERP (Production)	Resolution Time	1 hour 33 minutes

ISSUE DESCRIPTION

Since this morning at approximately 9:00 AM IST, Priya Mehta and three other members of the Accounts Payable team (**Rohit Verma, Sunita Rao, Deepak Joshi**) are completely unable to log into Oracle Financials. The system returns the following error upon login:

```
ORA-01017: invalid username/password; logon denied
```

This is blocking all invoice processing and payment runs. Today is the last day of the monthly payment cycle and the team has over 200 vendor invoices totalling approximately **₹1.8 crore** that must be processed before 5:00 PM IST to avoid late payment penalties.

STEPS TO REPRODUCE

- Navigate to <https://erp.acmecorp.internal/oracle/login>
- Enter valid AD credentials (confirmed working for Windows login)
- Click "Sign In"
- System returns ORA-01017 error immediately
- Password reset via Oracle self-service portal attempted — no change in behaviour

ADDITIONAL CONTEXT

Active Directory passwords were mass-rotated on July 14 at 11:30 PM as part of quarterly security policy enforcement. Oracle's LDAP connector was last synced at 10:00 PM on July 14 — before the rotation completed. Sanjay Kulkarni (Infrastructure) confirmed this at 9:55 AM.

BUSINESS IMPACT

CRITICAL — Financial operations fully blocked. Risk of ■1.8 crore in delayed payments, potential vendor penalties, and breach of payment SLA commitments. Escalation to CFO (Arun Sharma) has been flagged.

RESOLUTION NOTES

[10:45 AM] — Platform Engineering (Vikram Nair) identified root cause: Oracle LDAP connector sync job failed silently after AD rotation. Manually re-triggered LDAP sync.

[11:10 AM] — Sync completed successfully. All four affected users confirmed able to log in.

[11:15 AM] — Ticket closed. Post-mortem scheduled for July 17. LDAP sync monitoring alert to be added.
